Answer the following questions:

Question # (1)
Complete the following statements:

1- Matter is anything that has .... and occupy the space.

2- The sequence of day and night occurs as a result of revolution of the .... around its axis.

3- Plants are considered from .... organisms.

4- Sun is a star while earth ....

5- The nose is fined with .... to warm air before entering the two lungs.

Question # (2)
Write the scientific term for each of the following statements:

1- Ability to do work.

2- A process in which, oxygen gas to the lungs.

3- The building unit of living organisms.

4- Elements that have low melting point and haven't metallic luster.

5- A dark body revolves around the earth and reflects the sun rays that falling on it.

Question # (3)
Choose the correct answer:

1- Absorption of digested food occurs in .... (mouth – small intestine – stomach)

2- During the process of photosynthesis in the plants .... gas is evolved. (carbon dioxide – oxygen – chlorine)

3- Lungs is considered from the from the component of .... system. (digestion – reproduction – respiratory)

4- A .... juice digest of fats. (bile – pancreatic – salivary)

5- Dissolving of sugar in water is considered as .... change. (chemical – physical – both)

Question # (4)
Put (√) in front of the correct statements and (X) in front of wrong one:

1- The animal cell contains nucleus cytoplasm and cell membrane. ( )

2- Mars planet is known as red planet. ( )

3- Sound is produced due to vibration of objects. ( )

4- The solid material has a definite shape and fixed volume. ( )

5- The yeast is an unicellular organism. ( )

Answer the following questions:

Question # (1)
Complete the following statements:

1- The stomach secrets .... juice which digest .... partially digestion.

2- Kilogram is the unit of measuring .... and it is equals .... gram.

3- We can test the presence of starch in a plant leaf by using ....

4- The nearest planet to the sun is ...., while .... is the biggest one.

5- Sun is a shining star that radiates .... and ....

Question # (2)
Put (√) in front of the correct statements and (X) in front of wrong one:

1- You can calculate the volume of irregular shaped stone by measuring ruler. (   )

2- The alveoli is in the trachea. (   )

3- Organ is consists of a groups of tissues. (   )

4- Bread mould is from decomposers. (   )

5- Carbon dioxide turbid the lime water. (   )

Question # (3)
Choose the correct answer:

1- The function of the nervous system is .... (sensation – digestion – excretion)

2- Which of the following is considered an organ .... ?
(yeast fungus – the heart – bean plant)

3- Center of the solar system is .... (earth – sun – moon)

4- The liter is the measuring unit of .... (mass – liquid volumes – copper)

5- From example of metal is .... elements. (oxygen – Sulphur – copper)

Question # (4)
Write the scientific term for each of the following statements:

1- The change that occur in the shape of the matter only not in the structure.

2- Everything has a mass and a volume.

3- Materials have no definite shapes and volumes.

4- The ability to do work.

5- A dark body revolves around the earth and reflects the sun rays that falling on it.

Answer the following questions:

Question # (1)

Complete the following statements:

1- A bile juice helps in digestion of .... and convert it into ....

2- .... gas is evolved during the process of photosynthesis and .... gas is evolved during the process of respiration.

3- Mars is known as .... planet, while Neptune is known as .... planet.

4- Melting of wax is a .... change, while burning of wax is a .... change.

5- Sun is a star radiates .... and ....

Question # (2)

A) Give a reason for each of the following:

1- Give cooking pots are made of aluminum.

2- Presence of epiglottis on the top of trachea.

B) Choose the correct answer:

1- The change of the matter from liquid state to the gaseous state is known as ....
(condensation – evaporation – melting)

2- From producers organisms .... (algae – reptiles – birds)

3- The stomach is a component of .... system. (digestive – urinary – reproductive)

Question # (3)

Write the scientific term for each of the following statements:

1- The electric charges that flow through connecting wires for long distances. (................................)

2- A phenomena resulting from rotating of the earth around its axis. (................................)

3- The process of converting foods from complex form to simple form by which body get benefits. (................................)

4- Respiratory canal supported with cartilaginous rings. (................................)

5- The ability to do work. (................................)

Question # (4)

Put (√) in front of the correct statements and (X) in front of wrong one:

1- Calculate the volume of irregular shaped by measuring ruler. (   )
